\$500 CASH AND \$27.50 A MONTH, INCLUDING ALL INTEREST. TERMS THAT MAKE IT A SINFUL WASTE TO RENT.

Our purchasers think this is the most delightful home site in Washington. YOU WILL THINK SO, TOO, after you see it. Middaugh & Shannon, Inc., addition to the city is located RIGHT ON PARK ROAD, the street which connects Washington and Columbia heights, and is, therefore, the SAME DISTANCE

It is the highest point in the city, commanding a view not equaled around Washington.

Because this property faces and is almost surrounded by large government parks you may here live far removed from the "canned life" of crowded streets. It is the one spot in the northwest where every man who is able to purchase a house can secure a comfortable home surrounded by the beautiful things of nature that make life really worth while, and at the same time be no farther out than Columbia or Washington Heights.

The fact that we own the property in the immediate neighborhood determines the character of the surroundings and leaves no uncertainty as to the future. We are bringing to this section not an irresponsible and shifting population, but a section of home-owners. Neighbors of high standing and repute. A class of people who have the courage to buy homes and the ability to earn the salery to save and pay for them. Each a man of worth—a desirable neighbor and a home owner—the very fact of living in this neighborhood identifying him as such.

Today this section is new, So was Bloomfugdale when we started there seven years ago. History will repeat itself here as there. The purchasers of the first houses will reap the greatest benefits.

AS TO TERMS.

To show our faith in the future of this section we offer terms that others will not or cannot make. Terms that for the first time give to you the means by which you can secure your home on the same monthly payment of just what the house will rent for. \$500 CASH AND \$27.50 A MONTH, INCLUDING ALL INTEREST, Of which an average of \$19.64 goes toward paying for the home, and only \$7.86 is taken for interest. It is because we purchased the largest tract of ground (9 acres—the old Whitney Close tract) ever sold in the northwestern part of the city proper that we are able to offer the extraordinary values that we do.

COME AND LOOK AT OUR COMPLETED SAMPLE HOUSES. You will have to wait until we can finish a house for you. But it is well worth waiting for. We can safely say that you have never visited nor been in a six-room home of this price where every room in it is as nice, or where you would be more pleased to entertain your friends. The lots are also unusual, being twenty feet front.

If you should desire we would complete your home for you in the spring.

We have some homes under construction with big side yards for \$5,150.

this or any other country, and exceeding even the export value of 1901, previously the record. Among chief exports, cotton maintains a long lead, with a value of \$400,000,000. The packing house product exported amounted in value to \$207,000,000. The imports of agricultural products, consisting mainly of the same articles year after year, reached their highest value in 1996—\$554,000,000. These included packing house products, \$96,000,000; sugar and molasses, \$86,000,000; coffee, \$73,000,000; silk, \$54,000,000; vegetable fibers, \$50,000,000; wool, \$39,000,000; tobacco, \$22,000,000; fruits, \$21,000,000. \$21,000,000; tea, \$14,000,000. In forest products 1906 shows an import value exceeding \$95,000,000, against a total value in of similar products amounting to

\$77,000,000. The favorable balance of trade it is very plain is due to farm products. For 1906 the agricultural exports exceeded similar

amounting to \$459,000,000.

If real estate, domestic animals, other live stock, implements and machinery are included the farmer's capital has increased ince the census valuation by probably eight billions of dollars, the present valuation being probably \$28,000,000,000. The report contains some interesting figures on meat production. In 1900, 93,502,000

meat animals were slaughtered and export-ed. "Every time the clock ticks a second during ten hours of a workday the farmer drives nine meat animals to the butcher."

More Scientific Agriculture.

The report says that "A more scientific agriculture would have raised crops in excess of the demands; but, when consumption demands and prices sustain, the farmer will respond, for the doors of knowledge and example are opening wider to him. No miracle would be required to double or even treble the production of cotton per acre. The corn crop can be increased by one-half per acre within one-fourth of a century and yet without reaching the limit, and the same may be said of wheat and many other crops. One-fourth of the dairy cows of the country One-fourth of the dairy cows of the country do not pay for their feed, and more than one-half of them pay no profit. The egg production per hen will be increased by at least a dozen a year within a generation, while some poultrymen foretell double that increase. If the hens of this year had each laid a dozen eggs more than they did, the increased value of this production would have possibly aggregated \$50,000,000. Now these conditions are reversed, labor, in second

a scarcity of farm capital. Now these conditions are reversed: labor is scarce and capital abundant.

"It is no little gratification to the head of the Department of Agriculture in presenting this picture of the farmer's place in the economy of the country and picturing the possibilities of his future to realize that his department has had an important share in producing the farmer's present prosperity, and must, if intelligently and generously administered, play an important part in developing his future."

BONI WANTS TO ACT.

Thinks His Histrionic Abilities Are Worth \$2,000 a Week.

NEW YORK, November 29.-Lew Fields, the actor-manager, made public yesterday a letter received from C. Maase, New York manager for H. B. Marinelli, the wellknown Parisian vaudeville promoter, in which it appears that Count Boni de Castelane is looking for a theatrical engagement in America. In his letter Mr. Maase says: "The proposition came to us indirectly, but from a source known by our correspondent to he authoritative and authentic. In substance Count Boni is not averse to 'earning' his living through dramatic art, but for reasons of his social fitness will not accept any of the numerous offers submitted to

him by Europ an managers.
"The negotiations led, however, to the consideration of an American appearance and I was advised to canvass the field for a suitable part, etc. Count Boni does not desire a vaudeville appearance, preferring a role that will allow of his being an artist rather than an attraction. • • • "I have submitted to the European agent

a synopsis of the French comedy part played by your Mr. Beban as being the best possible role for the count. • • • If you think this proposition can be used kindly let me know at once that I may advise my people by cable."

Mr. Fields said that the count would ex-

pect \$2,000 a week for forty weeks and that, while he would be willing to pay him a fair salary, he could not meet this demand. At the Marinelli offices in the Holland building, 40th street and Broadway, a rep-resentative of Mr. Maase said that the firm was somewhat in doubt as to Count Boni's motives in offering to appear on the stage. It was hinted that he might be using the proposition as a club to effect a financial settlement with the Goulds. In this event it is plain that Marinelli will drop the whole matter. If the count is sincere Marinelli will be a settlement of the settlement will be a settlement will be a settlement will be a settlement of the settlement of the settlement will be a settlement of the s inelli will gladly manage him whether he appears in vaudeville or in the "legitimate."
